### 7 Steps Post-Burnout for Reigniting Your Passion for Work

Burnout is unfortunately a common experience that few people know how to appropriately address. If you are burning out, do not fret. Here are seven steps to recover, take control of your life and regain passion for your work.

## > Information/Updates

### Internal review:

The Clinical team is in process of reviewing documentation for all members who have been enrolled in the CME more than 15 months. Please be prepared to review these cases together with our team, to ensure adequate supports are in place and youth and families are prepared for purposeful transition.

### Critical incident reporting:

This is a requirement by contract! [Learn more](#) about it with this video by Lisa Christensen.

### Website reorganization:

You may have noticed our [website](#) was reorganized. In an effort to make finding things a little more intuitive, everything is broken up into categories (e.g. documents under documents and assessments under assessments). Most items and resources are under the Provider Hub! If you need help finding something or you notice a dead link, please bring it to the attention of Erin Waszkiewicz at [ewaszkieicz@magellanhealth.com](mailto:ewaszkieicz@magellanhealth.com).

### Time zone alert:

Magellan's server is on Central time. This means work goes in on Mountain time but gets reported to us in Central time. This means you have until **11:59pm CST** to get documents in on the last covered day, before they are counted as late for non-authorization.
