

## Wyoming's High Fidelity Wraparound for Youth and Families

In order for services to be billable under this CMS Waiver-based program, the following four elements must be met –

1. The service **provider** must be **certified by Magellan to provide the given service** (beginning at Tier 1 for Family Care Coordinator, Family Support Partner & Youth Support Partner)
2. The service **provider** must be **active in the High Fidelity Wraparound network with Wyoming Medicaid** -
  - Initial application approved by WY Medicaid
  - Ongoing status updates with WY Medicaid that are current within the WY system
3. The **youth** must be **eligible for High Fidelity Wraparound services** -
  - The youth must be identified as eligible through an Independent Assessment process
  - The family is required to update their WY Medicaid every year to remain active (which means WY Medicaid needs to have a current address so mailed renewal letter can be sent directly to the guardian.)
4. The **youth** must be **authorized by Magellan** for the High Fidelity Wraparound service to be provided.

Elements #1 & #4 are to be met directly with Magellan as the Care Management Entity under Wyoming's Department of Health. Elements #2 & #3 are not responsibilities to be completed directly with Magellan.

If any one of these four elements are missing, then services will not be paid or will later have payment withdrawn.

Any Medicaid provider can call the IVR line (1-800-251-1268) and check on eligibility – but will not receive details as to whether the youth is eligible for the CME. HFWA providers should be having conversations with guardians about how best to manage their benefit and encouraging guardians to call Medicaid directly to make sure their information is updated as often as necessary. It is a guardian's responsibility to maintain that coverage for their child, not the HFWA provider.

These requirements and others under this CMS Waiver-based program can be reviewed in the [Wyoming CME Handbook Supplement and Appendices](#) & [CMS 1500](#).
